Barry Holben, the Vice President (sales) of Allen Organ Company will be touring *down under* in July. Barry is a terrific musician and was heavily involved in the development of Allen's Vista General MIDI module. We're thrilled that he's made time in his busy schedule to travel to Australia.

Barry will play recitals and conduct workshops in both Brisbane and Sydney with the theme ***Much more than just a church organ.*** If you'd like to preview Barry's style please follow this link to one of his performances on youtube.
